**ВИСНОВОК**

The infographic illustrates two methods of physical measurement. On the left, a boy and a girl stand next to a wooden height scale marked from 10 to 140 cm. The boy is reaching the 120 cm mark, and the girl is reaching the 100 cm mark. On the right, a woman's chest is being measured with a yellow tape measure. A green double-headed arrow indicates the measurement across the chest. The labels 'стать' (sex) and 'вік' (age) are positioned above the height measurement. The labels 'зріст' (height), 'маса тіла' (body mass), and 'обхват грудної клітки' (chest circumference) are positioned below the chest measurement. A large box labeled 'ВИСНОВОК' (conclusion) is at the bottom right.
